📄 **Task-2 Report**

Title: Deep Learning Image Classification

1. Objective
To build an image classification model using deep learning.

2. Dataset
CIFAR-10 dataset

3. Model Used
Simple Neural Network

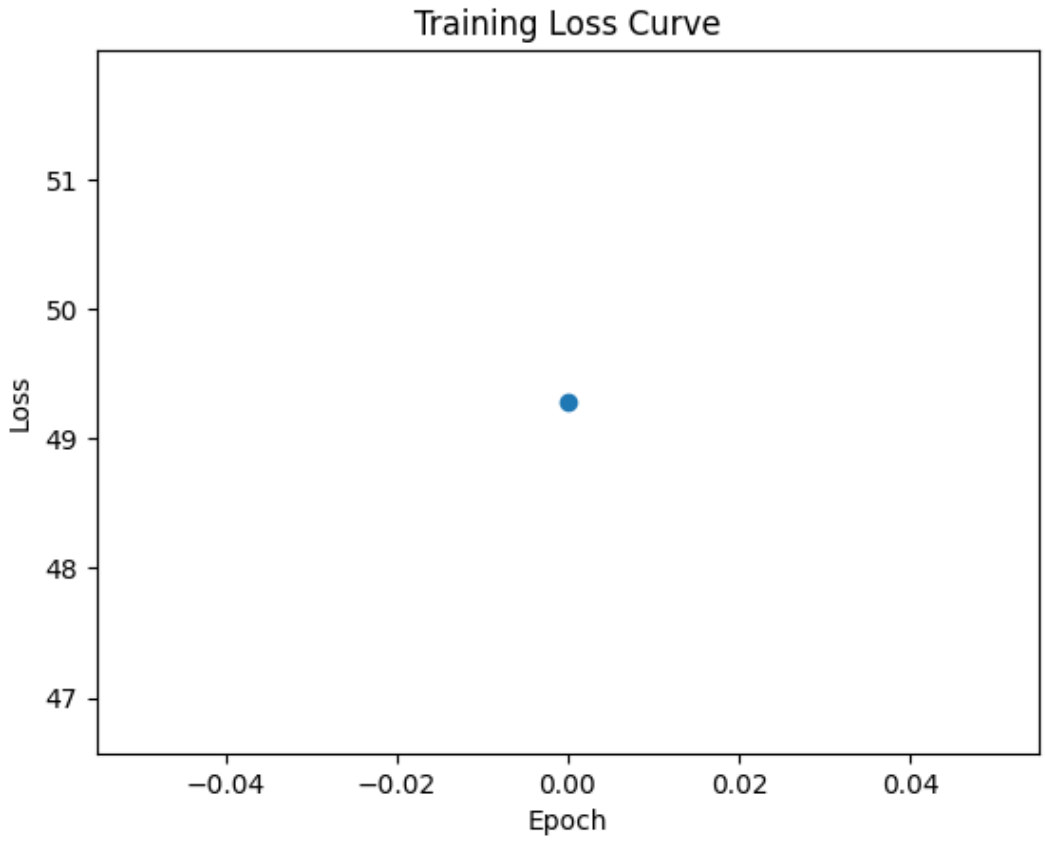
4. Techniques Used

- Data augmentation
- Model training
- Evaluation

5. Results

- Accuracy: 13.541666666666666

6. Output



```
Test Accuracy: 13.541666666666666
```

```
Model saved successfully
```

7. Conclusion

The model was successfully trained and evaluated.
